BetaQuick is the agentic AI development partner primes team with to bring a production-grade AI capability to their pursuit and their program. We build agentic AI that does the mission work end-to-end, governed and authorizable, and we deliver it as an outcome we own. Teaming with BetaQuick puts a live, FedRAMP-grade AI platform and two decades of federal delivery experience on your side, with a cleared small-business partner ready to stand up on award.

CORE COMPETENCIES

Agentic AI Delivery

Agentic AI that does the mission work end-to-end: intake, case processing, follow-up, constituent operations. Production voice agents on Amazon Connect (FedRAMP High). Agentic workflows on Azure OpenAI, AWS Bedrock, and Vertex AI, with tool-use orchestration and system-of-record write-back.

Governed & Authorizable

AI that reaches production, not pilots stuck in review. Our agents are controllable, evaluated, and human-escalated, built to pass authorization rather than retrofitted for it. RAG governance over HIPAA / PII / CJIS / CUI, with a full eval and reliability harness.

Government Delivery Posture

FedRAMP / StateRAMP boundary design & ATO support. HIPAA / HITRUST / CMS MARS-E alignment. VA Directive 6500 & CJIS posture. Section 508 & Title VI multilingual. Capture and proposal technical-volume support. Program-office stakeholder management.

DIFFERENTIATORS

- **Production AI today, not deck-ware:** we operate a live agentic AI voice + workflow platform on FedRAMP-authorized infrastructure. We run agents, we don't theorize about them.
- **Governed and authorizable by design:** our agents are controllable, evaluated, and human-escalated, built to pass authorization rather than bolted on before an assessment.
- **Partner, not body shop:** we engage as an outcome-owning AI development partner. We architect, build the hard pieces, and document the patterns so your team owns the platform.
- **Cleared small-business teammate:** Public Trust cleared bench, SAM.gov active, NAICS-aligned. BetaQuick LLC takes the AI SOW under your prime designation, supporting your small-business and set-aside requirements.
- **Ready in ~30 days:** from signed teaming agreement to stand-up in about a month.
- **Government delivery DNA:** two decades of cumulative team experience across SSA DCPS, NIH RTL, GDIT, and Capital One, plus production AI delivered to city, county, and state government today.

PAST PERFORMANCE — TEAM

CLIENT	ENGAGEMENT	PERIOD
SSA DCPS	Disability Case Processing System modernization - system-of-record for ALJ workflow.	2016-2021
NIH RTL Code System	Research terminology & code system platform for the National Institutes of Health.	2022-2024
General Dynamics IT	Federal systems integrator engagement - architecture & delivery on federal-civilian programs.	2015-2016
Capital One	Enterprise platform engineering at scale - cloud-native, regulated financial data.	2021-2022
Under Armour	Enterprise platform engagement - commercial scale, consumer-facing systems.	2016
BetaQuick AI Platform	Production agentic AI voice + workflow platform serving city, county, state, and federal-health buyers.	2024-Now
